portfolio: <https://josevigodev.github.io/personal-portfolio-web/>

Solid frontend knowledge of **React**, **JavaScript ES6+**, **HTML5** and **CSS3**.

Understanding of **design principles**, **UI/UX**, advance CSS (**CSS Modules**, **Tailwind CSS**).

Use of **Git** for version control and **Github** for remote repositories storage.

Positive attitude, strong work ethic, a drive for results while focusing on high code quality and performance.

ModMania – Landing Page

- A modern and visually immersive landing page for a fictional company that specializes in console modding.
- Built with performance, interaction and component-based in mind with **React + Vite** and **JavaScript**.
- Leverages smooth scroll animations and stylish visual elements made with **Tailwind CSS** and **GSAP**.

Job Hunt Organizer

- Application that helps you organize your job search process using a clean and interactive Kanban board
- Made with **React + Vite**, **JavaScript** and **CSS Modules**.
- You can add jobs, group them by status and move them between columns with **drag & drop API**.
- All data is saved locally using **localStorage API**.

Smart Expense Tracker

- Application designed to help users efficiently track, categorize, analyze their expenses.
 - Made with **React + Vite**, **JavaScript** and **CSS**.
 - Visualize expenses with chart (using **Recharts**).
 - Add, edit, delete, filter and print expenses.
 - All data is saved locally using **localStorage API**.
-
