### SKILLS

- Frontend web developer.
- Languages: HTML5, CSS3, JavaScript (ES6+)
- Frameworks/Libraries: React, Tailwind CSS, GSAP.
- Tools: Git, GitHub, Vite, npm, GitHub Pages .
- Other: Responsive Design, performance testing, user interface design.

### LANGUAGES

- Spanish (Native)
- English (Intermediate)

### PROFILE

Frontend developer focused on building performant, modern web experiences. Passionate about responsive user interface design (UI), scroll animations, and interactive visual design, work in a team, and contribute value to meaningful projects. I also have English skills that allow me to collaborate comfortably in technical environments.

### OWN PROJECTS

#### ModMania - Animated Landing Page

- React, Tailwind CSS, GSAP, ScrollTrigger.
- A fictional console modding company website built with immersive scroll animations and modern design. Focus on UI/UX, performance, and visual storytelling.

#### Job Hunt Organizer - Kanban Tracker

- React, CSS, localStorage.
- A web app to organize job applications using a Kanban board. Allows drag & drop between columns and stores data locally in the browser.

#### Smart Expense Tracker

- React, Chart.js, CSS
- Helps users track and categorize their expenses using charts and dynamic filtering. Fully responsive with clean and intuitive UI.

### EDUCATION

#### Self-taught Frontend Developer

2025 - present

Currently building real-world projects.

#### High School Diploma - Science Track

2018 - 2022

IPVCE Luis Urquiza Jorge - Las Tunas, Cuba

**Graduated: 2022**
